

The Big Switch

Australia's Electric Future Saul Griffith

An inspiring, practical plan to transform Australia's energy system and supercharge our response to the climate crisis

An optimistic – but realistic and feasible – action plan for fighting climate change while creating new jobs and a healthier environment: electrify everything.

Climate change is a planetary emergency. We have to do something now – but what? Australian visionary Saul Griffith has a plan. In *The Big Switch*, Griffith lays out a detailed blueprint – optimistic but feasible – for fighting climate change while creating millions of new jobs and a healthier environment. Griffith explains exactly what it would take to transform our infrastructure, update our grid, and adapt our households. Billionaires may contemplate escaping our worn-out planet on a private rocket ship to Mars, but the rest of us, Griffith says, will stay and fight for the future.

'I'm a scientist, inventor and father who wants to leave my kids a better world. The data convinces me that it is still rational to have hope.'

—Saul Griffith

SAUL GRIFFITH, PhD, is an Australian engineer and inventor. He's been a principal investigator on research projects for NASA, Advanced Research Projects Agency–Energy, the National Science Foundation and US Special Operations Command. He was awarded the MacArthur 'Genius Grant' in 2007.
